CIRC HQ STUDENT HANDOUT | GRADES 5 AND 6

Set Up Your Laptop

Goal: I can set up my school laptop so it is comfortable to use, and I can reach Teams, OneDrive and the right printer on my own.

35 minutes | 7 steps | Digital Literacy | Playbook B meeting 2

Ask | Plan | Build | Test | Improve

You are done when

These laptops are brand new. Close the lid gently with two hands. Back on the cart, plugged in, cable not crushed. Tell your teacher the one step that did not work for you.

You will use

- One school laptop per student, charged
- Student school account sign-in
- The hallway printer name on the board, only if you have time for the optional last step
- A projected copy of the teacher screen

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Left and right click — 4 min

- Find the two bottom corners of the trackpad.
- LEFT click picks something. It is the one you use most.
- RIGHT click opens a menu of choices. You need it in one minute.
- Practise: right-click on the desktop. A menu should appear. Press Escape to close it.

2 Step 2: Best performance — 6 min

- RIGHT-click the battery icon at the bottom right.
- Choose Power and battery settings.
- Find the power mode boxes. There are TWO: On battery, and Plugged in.
- Set BOTH of them to Best performance.
- Stay on this screen. You need it next.

3 Step 3: Night light — 7 min

- Maximize this window so you can see the whole thing.
- At the top there is a search box that says Find a setting. Type: night light.
- Toggle Night light ON. Slide it ALL the way to the right.
- Look at how orange that is. Now bring it back to 25 percent.
- Close Settings.

4 Step 4: Teams settings — 6 min

- Open Microsoft Teams and sign in with your school account.
- Click the three dots next to your profile picture, then Settings.
- You will see FOUR checkboxes. Turn them all OFF.
- They are about auto-starting Teams, running in the background, and staying open when you close it.
- Read the exact wording off your own screen and check your neighbour.

5 Step 5: The blue cloud — 8 min

- Open OneDrive and look at the cloud icon.
- BLUE cloud means you are signed in. You are done, help someone near you.
- GREY cloud with a line through it means you are NOT signed in.
- If it is grey: LEFT-click it once and follow each prompt. Next, Next, Use this folder, Keep yes.
- Hand up if it will not let you in.

6 Step 6: Check each other — 2 min

- Check your partner: night light at 25, both power boxes on Best performance, blue cloud.
- Only if there is time left, add the printer your teacher wrote on the board.

7 Step 7: Respect the machine — 2 min

- These laptops are brand new. Close the lid gently with two hands.
- Back on the cart, plugged in, cable not crushed.
- Tell your teacher the one step that did not work for you.

What to turn in

Show the teacher your blue OneDrive cloud and Teams open.

No computer? Another way to do it

Pair with a neighbor and watch. Nobody signs in for anyone else.

Finished early? Next challenge

Help someone at your table who is not finished yet, then check your own night light is back at 25 percent.

Stay safe

Nobody signs in as anybody else. If a student cannot get into their account, they pair with a neighbour and watch rather than borrowing a login. Laptops stay on the table, not on laps, and go back on the cart at the end.

Grade targets

Grade 5: Follow along step by step with the projected screen.
Grade 6: Help a neighbor after your blue cloud check.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
