CIRC HQ STUDENT HANDOUT | GRADES 5 AND 6

Tinkercad 3: Align and mirror

Goal: I can use duplicate, mirror and align to make both sides of a model match.

35 minutes | 7 steps | Computer Science and Programming, Digital Literacy | Playbook A meeting 26

Ask | Plan | **Build** | **Test** | Improve

You are done when

Name the tool that helped your two sides match.

You will use

- Cart laptops, charged
- Tinkercad Classroom class code
- Projected teacher demo
- Folded grid paper for the no-device path

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Sign in — 4 min

- Get your laptop.
- Open Tinkercad with the class code.

2 Step 2: Recap — 1 min

- Tell a partner what Group does.

3 Step 3: Watch mirror — 4 min

- Watch one half become two with Mirror.
- Watch Align line them up.

4 Step 4: Build a matching model — 15 min

- Build one half of a trophy or rocket.
- Duplicate it, then Mirror it.
- Use Align to line both halves up.

5 Step 5: Check both sides — 4 min

- Do both sides match?
- Fix one side if they do not.
- Show a partner both sides on screen.

6 Step 6: Save and shut — 4 min

- Check that your work saved.
- Close the lid with two hands.
- Put the laptop back in its slot and plug it in.

7 Step 7: Name the tool — 3 min

- Name the tool that helped your two sides match.

What to turn in

A model with matching sides.

No computer? Another way to do it

Draw one half on folded grid paper, cut, and open it.

Finished early? Next challenge

Add your initials and check that they read the right way.

Stay safe

Nicknames or initials only. Laptops stay on the table.

Grade targets

Grade 5: Build one half, then mirror and align it.
Grade 6: Add initials that stay readable after mirroring.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
