CIRC HQ STUDENT HANDOUT | GRADE 5

Innovation Studio 2: Change one thing and retest

Goal: I can change one part of my design, run the same test, and decide to keep or undo it.

35 minutes | 8 steps | Engineering and Design | Playbook A meeting 21, grade 5 path; Playbook B meeting 22, grade 5 path

Ask | Plan | Build | Test | Improve

You are done when

Show your before and after results to the teacher.

You will use

- Your studio model from last time
- Before and after record sheet
- Leftover maker bin
- Small tray per team
- Test tools from last time

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Get ready — 2 min

- Get your model and record sheet.
- Read the goal: one change, same test.

2 Step 2: Find your baseline — 1 min

- Find last time's test result.

3 Step 3: Read your baseline — 4 min

- Look at last time's test result.
- Pick the one part that held you back.

4 Step 4: Make one change — 12 min

- Change one part only.
- Keep the test the same.

5 Step 5: Retest — 8 min

- Run the same test again.
- Record the new result next to the old one.

6 Step 6: Keep or undo — 3 min

- Did the change help?
- Keep it or undo it. Write why.

7 Step 7: Reset together — 3 min

- Return tools and reusable pieces.
- Put unfinished work in the class tray.
- Clear your table and floor.

8 Step 8: Show your result — 2 min

- Show your before and after results to the teacher.

What to turn in

Before and after results and a keep or undo reason.

No computer? Another way to do it

Draw the change, act out the test, then decide keep or undo.

Finished early? Next challenge

Write the next change you would try and why.

Stay safe

Use teacher-approved materials only. The teacher manages any knife cuts or hot glue. Keep the test the same as last time.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
