Tank 5: Practice the tricky part

Goal: I can practice one connection or moving part before using it in my prototype.

35 minutes | 7 steps | Engineering and Design | Playbook A meeting 12, grade 6 path; Playbook B meeting 13, grade 6 path

Ask | Plan | **Build** | **Test** | Improve

You are done when

Demonstrate your practice part and name the improvement.

You will use

- Clean cardboard
- Paper
- Pencils
- Rulers
- Student scissors
- Masking tape
- Reusable trays
- Craft sticks
- String
- Paper fasteners
- Rubber bands

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Get ready — 2 min

- Read today's goal.
- Look at the example.

2 Step 2: Tell your partner — 1 min

- Tell your partner one useful detail.

3 Step 3: Watch and try — 5 min

- Watch a tab, hinge, slider, or string pull.
- Identify where friction, looseness, or weakness could occur.

4 Step 4: Make it work — 17 min

- Choose the hardest working part in your plan.
- Build a small practice sample using scrap.
- Try the movement or connection several times.

5 Step 5: Check one thing — 5 min

- Name the first weak or unreliable point.
- Change one feature.
- Keep the stronger sample as a reference.

6 Step 6: Reset together — 3 min

- Return tools and reusable pieces.
- Label your work with the class storage code.
- Clear your table and floor.

7 Step 7: Show your result — 2 min

- Demonstrate your practice part and name the improvement.

What to turn in

An improved practice sample in the class crate.

No computer? Another way to do it

Tape and tab joins only.

Finished early? Next challenge

Improve the same work or rehearse your explanation. Ask before taking more materials.

Stay safe

Keep moving parts at table level. No launching or pinching tests. Use only teacher-approved tools.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
