CIRC HQ STUDENT HANDOUT | GRADES 5 AND 6

Tinkercad 5: Fix, export, queue

Goal: I can fix my design, export it, and put it in the class print folder with a clear name.

35 minutes | 7 steps | Computer Science and Programming, Digital Literacy | Playbook A meeting 28

Ask | Plan | Build | Test | **Improve**

You are done when

Tell the teacher your file label and where you saved it.

You will use

- Cart laptops, charged
- Tinkercad Classroom class code
- Class print folder the teacher set up
- File name pattern on the board: table number and piece

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Sign in — 4 min

- Get your laptop.
- Open your skate park piece.

2 Step 2: Read your note — 1 min

- Read the teacher note about your design.

3 Step 3: Fix flagged parts — 12 min

- Fix what the note says.
- Check the size and flat bottom again.

4 Step 4: Export — 7 min

- Choose Export, then STL.
- Name the file with your table number and piece.

5 Step 5: Queue it — 4 min

- Put your file in the class print folder.
- Check that your file name is there.
- Remember your file label and folder.

6 Step 6: Save and shut — 4 min

- Check that your work saved.
- Close the lid with two hands.
- Put the laptop back in its slot and plug it in.

7 Step 7: Tell the teacher — 3 min

- Tell the teacher your file label and where you saved it.

What to turn in

An STL file in the class print folder, named with your table number.

No computer? Another way to do it

Fix the paper drawing and cut the final cardboard piece at 1:1.

Finished early? Next challenge

Design a second piece that connects to your first.

Stay safe

Nicknames or initials only in file names.

Grade targets

Grade 5: Fix and export one piece.
Grade 6: Design a second piece that connects to the first.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
