CIRC HQ STUDENT HANDOUT | GRADES 5 AND 6

Tinkercad 6: Build day and pitch

Goal: I can assemble our table's skate park, test it, and pitch what we made.

35 minutes | 7 steps | Computer Science and Programming, Digital Literacy, Engineering and Design | Playbook A meeting 29

Ask | Plan | Build | Test | Improve

You are done when

Name one skill you used from all six visits.

You will use

- Printed pieces so far, laid out by table
- Thin cardboard and tape for any piece not printed
- Size gauge
- Park base sheet per table
- Test boards

Steps

35 minutes total. Your teacher says when to move on.

1 Step 1: Get ready — 2 min

- Find your table's pieces.
- Read the goal: build, test, pitch.

2 Step 2: Plan the park — 1 min

- Decide where each piece goes.

3 Step 3: Build the park — 10 min

- Place your table's pieces on the base sheet.
- Use cardboard for any piece not printed.

4 Step 4: Test with a board — 6 min

- Roll a board over each piece.
- Fix one thing that catches.

5 Step 5: Pitch — 8 min

- Give your pitch.
- Say what it is, what was hard, and what you would change.

6 Step 6: Take home rule — 5 min

- Follow the take home rule for printed pieces.
- Recycle cardboard scraps.

7 Step 7: Show your result — 3 min

- Name one skill you used from all six visits.

What to turn in

Your pitch, and your piece tested on the table park.

No computer? Another way to do it

Build any unprinted piece in cardboard from the same numbers.

Finished early? Next challenge

Add one connecting piece in cardboard so two pieces flow together.

Stay safe

Pieces stay on the tables. Cardboard cuts use student scissors only.

Grade targets

Grade 5: Pitch in 30 to 45 seconds with a partner: what it is and what was hard.
Grade 6: Give a 60 second pitch that adds what you would change and why.

Stuck? Try this order

1. Read the step again, out loud if you can.
2. Ask a partner at your table.
3. Raise your hand. Keep working on the next part while you wait.
