STUDENT STATION PACKET

Explore. Build. Take your turn.

Keep this packet at your table. Your teacher chooses your project job.

1 Start together in MYnecraft

Try one feature your teacher shows. Show your partner what it does. Keep your existing world. Use Download Save when your teacher directs.

2 Groups of four: ChompSaw demo

Your teacher calls one group of four at a time. Watch, then take one short supported practice turn when invited. Return to your project when your group finishes. No waiting line.

3 While another group is at the demo

Work on your assigned job: the EC model, Eddie's cave prototype, a bird-nest model, or E/C bubble letters. Your teacher may keep a group in MYnecraft. You do not have to finish every project today.

4 Check, save and reset

Show one thing your group made and one thing you checked. Leave unfinished work in the assigned tray. Save digital work. Leave the next group a useful next step.

Your goal

Make one useful contribution, explain a design choice, and participate in the supervised demo. Drawing, pointing, speaking and pre-cut pieces are valid ways to take part.

PROJECT CARD 1

Finish the EC model

Choose only the part your teacher assigns. Protect work that is already attached.

- [ ] Paint the assigned area. Keep wet pieces in the drying place.
- [ ] Make or finish the roof.
- [ ] Make doors and windows that fit the measured spaces.
- [ ] Make four colored cardboard SV logos for the front.
- [ ] Make the entrance overhang.
- [ ] Make two flags and two flagpoles. Use the materials your teacher selects.

Measure before making

Point to the exact place for your part. Measure it. Sketch the part. Ask for the size and attachment check before cutting or fixing it to the school.

Our assigned part: _____

Target size / unit: _____

Material approved by our teacher: _____

Our fit check: _____

Done means: our part fits the job, stays together and is ready for a teacher check.

PROJECT CARDS 2-4

Choose one build job

Check the size, material and place with your teacher before you begin.

2 Eddie's cave - prototype

Sketch a cave shape with an opening and a stable base. Make a model that fits the space your teacher shows. Check that it stands and holds its shape.

Before making: agree on the footprint, opening and material. Bring the prototype to the teacher for any later use or placement.

3 Bird nest - model

Plan a base and sides. Use the supplied craft materials. Test whether the model keeps its shape when you move its tray.

Before making: agree on the size, material and display location. This is a classroom model.

4 E and C - bubble letters

Draw thick, rounded outlines for E and C. Check the size. Make the letters from approved material, then check that both letters are easy to read.

Before making: agree on separate or joined letters, size, color and where they will go.

Finished early? Check the fit or readability. Improve one detail. Ask before starting a different project.

I Spy is an idea for later. Wait for your teacher to set the objects and directions.

WRITE, DRAW OR TELL

Our group plan

One sheet per group. Keep completed sheets with classroom work, not on the public site.

Group: _____ Date: _____ Project: _____

Our job today is...

Sketch our contribution. Label a size and the material.

Size / unit: _____ Material: _____

Each person has a job. Swap jobs when it helps.

Plan and measure: _____

Make and assemble: _____

Check the fit: _____

Record and reset: _____

NO-DEVICE OPTION

MYnecraft on paper

Design a useful part of a shared learning space. Paper is a complete participation path.

What feature or building idea would you like to try? Why?

Draw a top view. Use the grid to show shape, spacing and a clear path.

A visitor will know where to go because...

One change I would test next: _____

GROUP EXIT SHEET

Check it. Leave a handoff.

A project can be unfinished and still show useful progress.

- [ ] We worked on our assigned job.
- [ ] We checked one size, fit, shape or design choice.
- [ ] Each person contributed in a workable way.
- [ ] We left tools and materials ready for the next group.

We made or changed...

We checked it by...

Next, this project needs...

My ChompSaw participation today

[ ] Supported practice turn [ ] Watched / assisted [ ] Still need a turn

Tell your teacher if your turn still needs to happen. Do not rush or use the tool alone.
