TEACHER QUICK START

Run this class in groups of four

One station lesson per incoming class this rotation. Keep the annual lesson on hold.

0-3 minutes | MYnecraft start

Everyone opens the existing world and tries one feature you show. Assign groups of four and a project job; the last group can be smaller. Pre-set the jobs and cutting blanks before class.

3-31 minutes | Seven demo groups

Call one group every four minutes. Give a brief ChompSaw demonstration, then invite each child to try one small supported practice cut. Other groups stay at their assigned projects or MYnecraft.

The target is a turn for every child. Pilot the timing. Use the checklist to carry forward any unfinished turns rather than rushing.

31-35 minutes | Save, reset, hand off

Secure the saw. Save digital work; store prototypes and wet work separately. Students name what they made, checked and left to do. Do not advance the annual Playbook A meeting for this station lesson.

Before the first group

Set out approved thin cardboard, pencils, rulers, scissors or pre-cut options, tape/tabs, trays, and selected paint/craft supplies. Choose dimensions, attachments and flagpole material from the actual model and stock. Set a single supervised tool area; do not also run a hot-glue station while watching the saw.

ChompSaw: follow the actual manufacturer instructions and school procedure. Use cardboard 3 mm or thinner; clear flat worktop; wait about 10 seconds after starting; switch off between cuts; no tape or glue in the cut line. Stop and help when needed.

PRIVATE CLASSROOM ROTATION SHEET

Every child gets tracked

Print one per class. Keep names or identifiers only in your private school records.

Class: _____ Date: _____ Total present: _____

Tick the four spaces after each actual practice turn. Note an absence, alternate role or missed turn.

Group / minutes	Learners / four turn checks	Follow-up
1 | 3-7	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
2 | 7-11	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
3 | 11-15	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
4 | 15-19	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
5 | 19-23	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
6 | 23-27	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____
7 | 27-31	___ [ ] ___ [ ] ___ [ ] ___ [ ]	_____

Still needs a turn / next action:

Four-minute windows are a planning target, not a speed requirement. A larger class needs an additional window or follow-up contact.

LINKS, PRINTING AND NEXT WEEK

Start using CIRC HQ

The public app and PDFs contain generic lessons only. Your class records remain private.

1. CIRC HQ - teacher home and Playbooks

https://percycodesios.github.io/CIRC-HQ/

Open Teacher side. Use the station-week entry. Start the lesson and open Student directions for projection. Your existing numbered lessons and class places remain intact.

2. MYnecraft - classroom compatibility route

https://percycodesios.github.io/CyberGrader.io/game/mynecraft.html

Use the current school browser. Download Save keeps a backup; do not reset or replace a child's existing world for this activity. No installer is required.

3. School Canva and approved resources

https://resources.svsd.net/

Use Canva later for the held logo-to-jingle lesson. Microsoft Forms answer activities are already linked inside WIN Classwork. Tinkercad remains a later unit; school approval and class setup come first.

Print only what you need

Student packet pages 1-3: one set per table. Page 4: one copy per group. Page 6: one per learner. Page 5: no-device option. Teacher page 2: one private turn sheet per class. Attach the PDFs as ordinary Teams Classwork files, or use the PDF links in CIRC HQ.

One full rotation later

October 12-16 is the station week. Resume the held annual lesson at the next actual class contact: cycle days 1-4 on October 19-22; cycle day 5 on October 26 because October 23 is closed in the current school calendar. Later lessons keep their order.

Saved for next year

Keep the Outdoor Microclimate Map and any unfinished lessons in the retained lesson bank. No lesson is deleted. Year-end cleanup still happens in each class's last visit. Actual class progress determines any further carryover.
